

WHAT IS CLAIMED IS:

- 1 1. A method for creating a sequential media presentation, said method
2 comprising:
3 providing graphic elements that represent media;
4 drawing a line that intersect some of said displayed graphic elements
5 to select desired media; and
6 displaying said desired media that correspond to said displayed
7 graphic elements that were intersected by said line.

- 1 2. A method for creating a sequential media presentation, said method
2 comprising:
3 providing a list of file names that represent media;
4 drawing a line through some of said file names to selected desired
5 media; and
6 displaying said selected media that correspond to said displayed
7 graphic elements that were intersected by said line.

- 1 3. A graphic user interface for an electronic device with a display comprising:
2 a first rectangular display region with a rectangular time line around a
3 perimeter of said rectangular display region to play selected media, said rectangular
4 time line corresponding to the length of time to play said selected media; and
5 a second rectangular display region in which multiple media of said
6 selected media can be simultaneously displayed.
